Instructions for Submitting a Solicitation Response

The Division of Purchasing is now posting all of its bid solicitation documents on the new MissouriBUYS Bid Board (<https://www.missouribuys.mo.gov>). MissouriBUYS is the State of Missouri's web-based statewide eProcurement system which is powered by WebProcure, through our partner, Perfect Commerce.

For all bid solicitations, vendors now have the option of submitting their solicitation response either as an electronic response or as a hard copy response. As a means to save vendors the expense of submitting a hard copy response and to provide vendors both the ease and the timeliness of responding from a computer, vendors are encouraged to submit an electronic response. Both methods of submission are explained briefly below and in more detail in the step-by-step instructions provided at https://missouribuys.mo.gov/pdfs/how_to_respond_to_a_solicitation.pdf. (This document is also on the Bid Board referenced above.)

- **ELECTRONIC RESPONSES:** To respond electronically to a solicitation, the vendor must first register with MissouriBUYS by going to the MissouriBUYS Home Page (<https://missouribuys.mo.gov>), clicking the "Register" button at the top of the page, and completing the Vendor Registration. Once registered the vendor accesses their account by clicking the "Login" button at the top of the MissouriBUYS Home Page. After locating the desired solicitation on the Bid Board, at a minimum, the vendor must read and accept the Original Solicitation Documents and complete pricing and any other identified requirements. In addition, the vendor should download and save all of the Original Solicitation Documents on their computer so that they can prepare their response to these documents. Vendors should upload their completed response to these downloaded documents (including exhibits, forms, and other information concerning the solicitation) as an attachment to the electronic solicitation response. Step-by-step instructions for how a registered vendor responds to a solicitation electronically are available on the MissouriBUYS system at: https://missouribuys.mo.gov/pdfs/how_to_respond_to_a_solicitation.pdf. Any such electronic submissions must be received prior to the specified end date and time.
 - Vendors are encouraged to submit their entire proposal electronically; however in lieu of attaching exhibits, forms, pricing, etc. to the electronic solicitation response, a vendor may submit the exhibits, forms, pricing, etc. through mail or courier service. However, any such submission must be received prior to the solicitation's specified end date and time. Be sure to include the solicitation/opportunity (OPP) number, company name, and a contact name on any hard copy solicitation response documents submitted through mail or courier service.
 - In the event a registered vendor electronically submits a solicitation response and also mails hard copy documents that are not identical, the vendor should explain which response is valid for the state's consideration. In the absence of such explanation, the state reserves the right to evaluate and award the response which serves its best interest.
- **HARD COPY RESPONSES:** When responding with a hard copy response, any such submission must be received prior to the specified end date and time. Be sure to include the solicitation/opportunity (OPP) number, company name, and a contact name on any hard copy solicitation response documents.

End of Instructions for Submitting Solicitation Response

1. INTRODUCTION AND GENERAL INFORMATION

1.1 Introduction:

1.1.1 This document constitutes a request for competitive, sealed proposals for the provision of Building Automation Control System Maintenance and Repair Services as set forth herein.

1.1.2 Organization - This document, referred to as a Request for Proposal (RFP), is divided into the following parts:

- 1) Introduction and General Information
- 2) Contractual Requirements
- 3) Proposal Submission Information
- 4) Pricing Page(s)
- 5) Exhibits A - I
- 6) Terms and Conditions

1.2 Inspection of Building Systems:

1.2.1 Potential vendors should inspect each facility's building systems prior to proposal submission to examine and assess the facilities' building systems and any other existing condition, factor, or item that may affect or impact the performance of service described and required by the Contractual Requirements.

1.2.2 The vendor must contact each facility's head of maintenance, designated plant maintenance engineer, or maintenance supervisor for each facility indicated below to schedule the inspection of the facility's building systems.

- a. The vendor must provide at least 72 hours advance notice of the vendor's desire to inspect the building systems.
- b. The vendor is strongly encouraged to advise each facility's head of maintenance, designated plant maintenance engineer, or maintenance of any special accommodations needed for disabled personnel who will be attending the inspection so that these accommodations can be made.
- c. The vendor must be prepared to provide the facility's head of maintenance, designated plant maintenance engineer, or maintenance supervisor with the name, social security number, state of residence, and date of birth for the person(s) conducting the inspections for security clearance purposes.
- d. The vendor must obtain prior authorization from the facility's head of maintenance, designated plant maintenance engineer, or maintenance supervisor if the vendor is anticipating the use of camera equipment during the inspection of the building systems.
- e. A record of those potential vendors conducting an inspection will be maintained for verification purposes.
- f. The contact information is as follows:

When *Sprint* called, Andover answered and provided this worldwide leader in telecommunications with the solution to their critical information requirements for central monitoring and control of their building systems across the United States. The *Sprint* project, done under a working partnership agreement with Andover Controls' Global Accounts Program, showcases Andover Controls' state-of-the-art communication capabilities utilizing *Sprint's* own network infrastructure for TCP/IP communications.

With the Andover system, front-end workstation operators based in *Sprint's* Kansas City Building Management Control Center (BMCC) are centrally monitoring and controlling numerous *Sprint* central office switching sites and Point-of-Presence (POP) sites located nationwide. These facilities house vital and highly sophisticated telecommunications switching equipment that must be maintained in a carefully controlled and secure environment. HVAC primary and back-up equipment, power monitoring, emergency generator and transfer switch status, underground fuel tanks, fire suppression and detection systems, and door monitoring are all under the control of Andover network controllers. T1 network communications between these central office switching sites and Kansas City provides workstation operators with instantaneous alarming and immediate access to critical real-time information. As a result, BMCC personnel can respond *immediately* to emergency situations that could potentially interrupt service to *Sprint* customers. The Andover system also allows BMCC personnel to coordinate service calls with preventative maintenance schedules, thereby reducing *Sprint's* technician call-out costs.

According to Margaret Pitts, Manager of *Sprint's* BMCC, "With the Andover system, we have eyes and ears at every central office switching site that never sleep."

Andover's in-house Global Engineered Services Group developed a custom user-friendly interface through the Andover front-end that provides BMCC personnel with alarm notification and easy access to critical information. After factory training, BMCC now maintains and enhances the system to meet their needs.

Key to securing the *Sprint* agreement was Andover's proven and extensive experience integrating alarm monitoring with HVAC control and security management for numerous telecommunications companies, including Verizon, SBC, and others.

Andover Controls

Andover's Global Accounts Program was developed to meet the needs of large customer accounts that have multiple sites and/or buildings extending beyond a single regional territory. Under this program, Andover's Global Accounts Manager provides a single point of contact for *Sprint* to ensure they receive the full range of support services, including direct factory support, preferred product pricing, and training; and that *standardization* throughout each *Sprint/Andover* installation is maintained nationwide.

Margaret Pitts sums up the Andover/*Sprint* partnership this way: "*Sprint* wants the best state-of-the-art environmental monitoring and control system in the telecommunications industry. Our buildings and our networks deserve it. But most of all, our customers' protection *demand*s it. We needed a system as sophisticated as the facilities it manages. *Sprint* has long range goals—we feel Andover Controls can meet our needs when we get there."

Andover Facility Automation Representative Ben Ackley of *Thermal Components*, Mission, Kansas, who acts as project coordinator for *Sprint* installations nationwide, states, "The sophistication of Andover's WAN technology allows us to create a transparent communications architecture over *Sprint's* network infrastructure. This means that all future sites can be easily connected to provide a single integrated solution for critical alarm monitoring at *Sprint's* BMCC. In addition, any remote sites without network connectivity can be easily integrated into the Andover architecture via modem."

**Certification Regarding
Debarment, Suspension, Ineligibility and Voluntary Exclusion
Lower Tier Covered Transactions**

This certification is required by the regulations implementing Executive Order 12549, Debarment and Suspension, 29 CFR Part 98 Section 98.510, Participants' responsibilities. The regulations were published as Part VII of the May 26, 1988, Federal Register (pages 19160-19211).

(BEFORE COMPLETING CERTIFICATION, READ INSTRUCTIONS FOR CERTIFICATION)

- (1) The prospective recipient of Federal assistance funds certifies, by submission of this proposal, that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any Federal department or agency.
- (2) Where the prospective recipient of Federal assistance funds is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal.

Instructions for Certification

1. By signing and submitting this proposal, the prospective recipient of Federal assistance funds is providing the certification as set out below.
2. The certification in this clause is a material representation of fact upon which reliance was placed when this transaction was entered into. If it is later determined that the prospective recipient of Federal assistance funds knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, the Department of Labor (DOL) may pursue available remedies, including suspension and/or debarment.
3. The prospective recipient of Federal assistance funds shall provide immediate written notice to the person to which this proposal is submitted if at any time the prospective recipient of Federal assistance funds learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.
4. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of rules implementing Executive Order 12549. You may contact the person to which this proposal is submitted for assistance in obtaining a copy of those regulations.
5. The prospective recipient of Federal assistance funds agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the DOL.
6. The prospective recipient of Federal assistance funds further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion - Lower Tier Covered Transactions," without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.
7. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may but is not required to check the List of Parties Excluded from Procurement or Nonprocurement Programs.
8. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.
9. Except for transactions authorized under paragraph 5 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal Government, the DOL may pursue available remedies, including suspension and/or debarment.
