Offender Classification, Institutional Population, June 30, 2007

'Unclassified' includes recently admitted offenders who have not completed the classification process and offenders sentenced to a 120-day program. 120-day offenders do not receive a full classification upon admission because of the expected short prison stay.

The length of sentence and institutional behavior determines the custody level. Offenders with more than eight years to serve or convicted of a dangerous felony and with more than five years to serve are C-5 (maximum security). Offenders with less than 12 months to serve and with good institutional behavior are C-1. Sex offenders who are required to complete the Missouri Sex Offender Program have a custody override of C-4. Escapees are held at C5 institutions until release.

Admissions to prisons have increased at 1.6% per year in the last five years compared to 2.1% from 1998 to 2002. What is of significance to the department, because of the impact upon the prison bed capacity, is the increase in new admissions that are sentenced to a prison sentence. From FY1998 to FY2002 the new term admissions increased 3.6%, but since 2002 the annual increase has slowed to 2.3%.

+ The felony class of the most populous charge code. The offense may include more than one charge code.

Life Sentences are included and computed at 30 years.

New court commitments include offenders sentenced by the courts to a term commitment. New court commitments do not include offenders sentenced to a 120 day or long term drug program or offenders on probation or parole, who have been convicted of a new offense. Offenders convicted of the attempt are included.

The felony class is the current felony class for the offense. Some offenses, including Child molestations 1st and Endangering the Welfare of a Child, have had the felony class of the offense increased during the analysis period.

Authorized Female Releases From Prison, FY 1998-2007

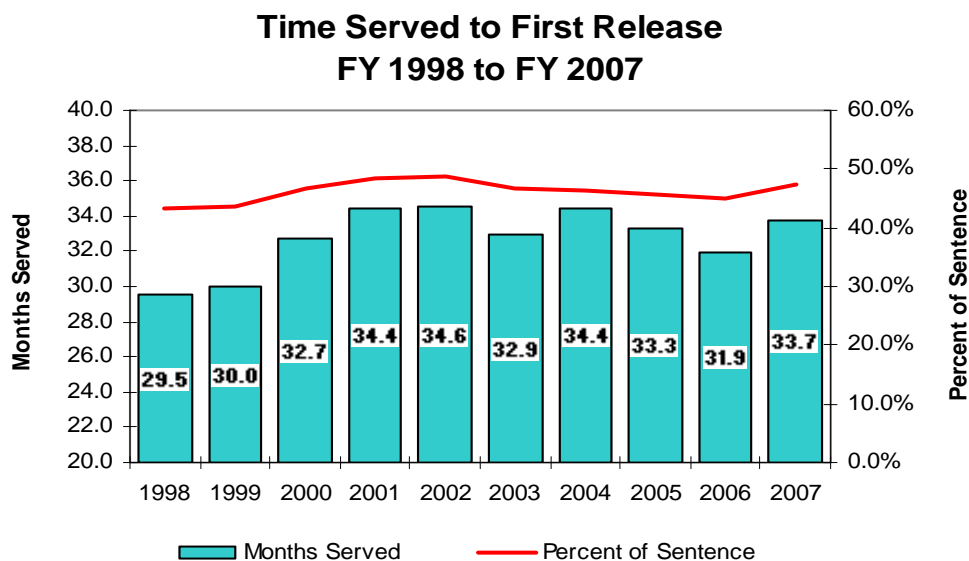

The number of females released to parole has more than doubled since 1998 while the number of female offenders released on the conditional release date has been reduced since 2002 to 2006. In 2007 the number of female offenders released on conditional release date is higher than the number in 2002.

7. Time Served to First Release

Time served as a percent of the sentence in FY 2007 increased from 44.9% in FY 2006 to 47.5%. This increase can, in the main, be attributed to an increase in time served by offenders convicted of violent and sex offenses. Offenders convicted of offenses committed after August 28, 1994 have to serve a minimum prison term if they have committed a dangerous felony (85%) or have prior incarcerations with the Missouri Department of Corrections (40% one prior, 50% two priors and 80% three or more prior incarcerations). In FY 2007 19% of offenders released has a minimum mandatory prison term, up from 16% in FY 2006. Time served includes jail time that is credited to an offender's sentence for incarceration prior to receipt by the Department of Corrections. Offenders convicted of a sex offense in Chapter 566 RSMO have to complete the Missouri Sex Offender Program before being eligible for a parole release.

8. Recidivism Rates by Institutional Releases for FY 1998 to FY 2007

There are many ways to measure recidivism and there are no national standards. The rates calculated by the Missouri Department of Corrections and included in the Offender Profile are for offenders first released in the commitment. These are offenders admitted to prison to serve a new commitment and released to either parole, conditional release or on the discharge of the sentence. Excluded from the calculation is the release of parole violators who have previously been returned to prison for a violation of supervision within the commitment. Recidivism rates that include the release of parole violators are higher than the first release recidivism rates.

The recidivism rates measure two outcomes:

1. The first return to prison following the release (technical violation of supervision or new conviction),
2. The first conviction following the release from prison (the new conviction can be a new prison sentence or probation, because the majority of offenders returned from parole are returned for a technical violation). The new conviction recidivism rate is not a useful indicator until two or more years from release.

The data for the calculation of the rates are taken from the DOC offender database. Offenses and incarcerations in other states will not be included unless the offender is returned to the custody of the DOC.

Other recidivism rates are given in the Offender Supervision profile for offenders released to probation following a 120-day or long-term drug program and for offenders serving a new court probation.

There was a change in the measurement of recidivism in the FY06 Offender Profile. The first release population includes offenders who abscond from a community release center. Because the majority of offenders who abscond are returned to prison, the change has resulted in an increase in the recidivism rate compared to the rates shown on the FY05 Offender Profile. Offenders who absconded from community release centers were previously excluded from the recidivism rates because, before the Board of Probation and Parole took over the operational management of the community release centers, offenders were normally released to community release centers on inmate status.

Time Served to First Release

Time served as a percent of the sentence in the last three years has increased from 70.8% to 75.4%. Offenders convicted of offenses committed after August 28, 1994 have to serve a minimum prison term if they have committed a dangerous felony (85%) or have prior incarcerations with the Missouri Department of Corrections (40% one prior, 50% two priors and 80% three or more prior incarcerations). Time served includes jail time that is credited to an offender's sentence for incarceration prior to receipt by the Department of Corrections.

Execution is an authorized punishment for offenders convicted of Murder 1st degree. Offenders not sentenced to death must serve life without parole. The first execution in Missouri following the US Supreme Court decision authorizing the legality of capital punishment statutes took place in 1989, although the new capital punishment law became effective in Missouri on May 26, 1977. From June 30, 1991 to June 30, 2007 there have been 62 executions.

The statistics count offenders on the first receipt by the Department of Corrections for a conviction of Murder 1st degree, for an offense committed after October 1984. Prior to October 1984, Murder 1st degree allowed parole. Re-sentencing and commutation of the death penalty are not included in the charts.

Offender Needs Score

The Need Score is a risk and needs assessment completed by the supervising probation and parole officer. For offenders on regular supervision it is updated every 60 days. The assessment determines the level of supervision and the need for community programming and supervision strategies. The scoring of the components of the last needs assessment on or before June 30, 2007 is shown after the level of supervision. Offenders in the community release centers are not included in the Needs assessment.

Other	76.3%	5.3%

Supervision openings have decreased 0.05% per year in the last four years compared to 4.2% from 1998 to 2003. What is of significance to the department, because of the impact upon supervision caseload, is the increase in paroled offenders of 2.9% per year and the yearly increase in 120-Day offenders. Senate Bill 5 enacted in 2003 removed non-violent misdemeanor cases from DOC probation supervision, and this has been the main reason for the decline in new court probations.
