The Potency of Faith in The Corrections Module

As humans are complex multi-faceted beings, so, too, are their needs when seeking out value, significance, and worth. They are more than the object of a program or the tool of a new initiative. There must be more than conformity and robotic compliance to those who in power. So it is with the incarcerated person. Many are accustomed to “going along to get along”. This perspective works only until the price for non compliance is eclipsed by the delicious fruit of self gratification. With this perspective, no price is too high, no level too low. Many times not even personal shame, loss of one’s family, one’s marriage or the return to prison can deter this self destructive behavior. **There is an answer!** Instead of changing one’s direction by sheer will, the entire “operations mechanism” must be replaced. This is where the faith component comes into play. Many offenders are eager to re-evaluate faith principals because they realize their self-seeking strategy has failed them miserably. Chapel programs challenge offenders to address the spiritual issues deep inside that they have ignored or denied. Prison chaplaincy is an exciting and rewarding career ministry. Offenders need to see chaplains as spiritual role models who effectively administer a professional chapel operation and orderly, relevant, “needs based” programming. Volunteers need to be directed and supervised in a team approach that is friendly and professional yet deliberate and strategic, placing offender’s needs above volunteer wants.

Perhaps it’s time to take a look at Prison Chaplaincy- maybe it’s for you!
